

## InSite Client Configuration

### Overview

The Kodak InSite family of products use Apple Macintosh and Microsoft Windows client computers to connect over the Internet to servers that are running the InSite software. This document describes the supported configurations for workstation computers that will be used to access the InSite software.

This document applies to the following versions of the InSite family of products:

Product	Applicable Software Version
Kodak InSite Prepress Portal	6.1
Kodak InSite Storefront	6.1
Kodak InSite Creative Workflow	4.1
Kodak InSite Asset Library	4.1
Kodak Matchprint Virtual	5.2, 6.0.1
Kodak PressProof	6.1
Kodak InSite Variable Data Print	Variable Data Print is now a licensed option of InSite Storefront 6.1.

**Note:** If you are connecting to an older version of any of the above software, see an earlier version of this document.

### Determining Your Client Computer Configuration

To find the details of your current client computer configuration, click **System Diagnostics** on the Login page of the InSite software. The system checks your computer's operating system, Web browser, Sun Java and JavaScript settings, speed of network connection, and proxy settings. It also tests your Smart Review connection and your upload and download connections.

# Technical Bulletin

## Internet Connection

Your Internet connection must meet the following requirements:

- Has a high-speed connection of at least 64 kilobits per second (Kbps)
- Provides access to the InSite or PressProof server on ports 80 and 443 and does not analyze traffic on port 443
- Does not block .jar or .jnlp files

## Recommended Client Computer Hardware Configurations

The following tables describe the recommended hardware configurations for computers running a Mac OS or Windows operating system.

<b>Recommended Mac Computer Configuration</b>	
Display Resolution	1024 x 768 or higher. If the display resolution is lower than 1024 x 768, you may be unable to see all of the available tools and features.  Color-accurate viewing with Matchprint Virtual has additional monitor requirements. For details, see the <i>Matchprint Virtual Monitor Selection Guide</i> .
Memory	<ul style="list-style-type: none"><li>• 2 GB of RAM for the PressProof software If you use multiple monitors with PressProof, 4 GB is recommended.</li><li>• 1 GB of RAM for all other InSite software</li></ul>
Central Processing Unit (CPU)	Apple iMac computer, Apple Mac Pro computer, or Apple Mac mini computer (with an Intel Core Duo processor)

<b>Recommended Windows Computer Configuration</b>	
Display Resolution	1024 x 768 or higher. If the display resolution is lower than 1024 x 768, you may be unable to see all of the available tools and features.
Memory	1 GB of RAM  If you run other software at the same time, more memory will be needed.

## Supported Operating Systems, Java, and Web Browsers

The following tables describe the operating systems, Java versions, and Web browsers that are supported by each product in the InSite family. The first and second tables describe the supported configurations when you connect through a Web browser on a Mac or Windows workstation. The third table describes which Mac and Windows operating systems are supported when you connect through the Kodak InSite Desktop software.

Mac Computers*—Supported Configurations for Web Browser Connections							
Operating System	Java VM	Web Browser	InSite Product				
			Prepress Portal	Storefront	Creative Workflow, Asset Library	Matchprint Virtual	PressProof
Mac OS X 10.6 (Snow Leopard)	Java 1.5 or later for Mac	Apple Safari 3.x, 4.0.x, 5.0	✓	✓	✓	✓	✓
		Mozilla Firefox 3.x	✓	✓	✓	✓	✓
Mac OS X 10.5.4 or later	Java 1.5 or later for Mac	Safari 3.x, 4.0.x, 5.0	✓	✓	✓	✓	✓
		Firefox 3.x	✓	✓	✓	✓	✓
Mac OS X 10.4.11	Java 1.5 or later for Mac	Safari 3.x, 4.0.x	✓	✓	✓	✓	✓
		Firefox 3.x	✓	✓	✓	✓	✓

- No scripted proxy support for Mac OS X

**Important:** On Mac computers running the Safari software, you must allow files to open after downloading. In the Safari software, select **Preferences**. On the **General** tab, select **Open “safe” files after downloading**.

**Important:** Parental controls must be disabled on Mac computers.

Windows Computers—Supported Configurations for Web Browser Connections					
Operating System	Java VM	Web Browser	InSite Product		
			Prepress Portal	Storefront	Creative Workflow, Asset Library
Windows Server 2003 R2 SP2	Sun Java 1.5 or 1.6	Internet Explorer 7.x or 8.x	✓	✓	✓
		Firefox 3.x	✓	✓	✓
Windows Vista (32-bit only)	Sun Java 1.5 or 1.6	Internet Explorer 7.x or 8.x	✓	✓	✓
		Firefox 3.x	✓	✓	✓
Windows XP (32-bit only)	Sun Java 1.5 or 1.6	Internet Explorer 7.x or 8.x	✓	✓	✓
		Firefox 3.x	✓	✓	✓
Windows 7	Sun Java 1.6	Internet Explorer 8.x	✓	✓	X
		Firefox 3.x	✓	✓	X

InSite Desktop—Supported Operating Systems	
Operating System	InSite Creative Workflow, Asset Library
Mac OS X 10.6 (Snow Leopard)	✓
Mac OS X 10.5.4 to 10.5.11	✓
Mac OS X 10.4.x	✓
Windows Server 2003	✓
Windows Vista (32-bit only)	✓

# Technical Bulletin

InSite Desktop—Supported Operating Systems	
Windows XP with Service Pack 2 (32-bit only)	✓
Windows 7	X

## Supported Adobe Flash Player Versions

The InSite 6.1 software is compatible with Adobe Flash Player version 9.0 or later.

**Note:** The InSite software running on Mac OS X 10.6 with the Safari software that is running on 32 bit is compatible with Adobe Flash Player version 10.1 or later.

## Supported InDesign Software

In the InSite Creative 4.0 and InSite Asset Library 4.0 software, to use the **Make viewable in Smart Review** option when uploading an Adobe InDesign element using Desktop, you must have one of the following InDesign Creative Suite software versions installed on a Mac computer:

- Creative Suite CS2
- Creative Suite CS3
- Creative Suite CS4 (Web only)

## Supported Proxy Servers

The InSite software works with proxy servers using the CERN protocol.

### Proxy Server Requirements

The proxy server must meet the following requirements:

- Supports both http and https client computer requests on a single port
- Has access to the InSite or PressProof server on ports 80 and 443 and does not analyze traffic on port 443

# Technical Bulletin

- Does not block .cab, .jar, or .jnlp files

## Client Computer Requirements

To connect to the proxy server, client computers must meet the following requirements:

- The proxy server IP address must be manually set.
- On a Mac computer, the proxy server IP address must be entered separately for http and https.
- Automatic proxy detection must be disabled.

## Scripted Proxy Configurations

Scripted proxy configuration is supported on Windows computers with the Internet Explorer browser and Java software 1.5 or later. Mac OS X does not support scripted proxy configurations.

## Supported Authentication Schemes

Authentication Scheme	Prepress Portal/ Storefront		Creative Workflow/ Asset Library			
	Web Browser (Mac)	Web Browser (Windows)	Web Browser (Mac)	Web Browser (Windows)	InSite Desktop for Mac	InSite Desktop for Windows
Bypass	x	x	✓	✓	✓	✓
Unauthenticated	✓	✓	✓	✓	✓	✓
Basic	✓	✓	✓	✓	✓	✓
NTLM	x	✓	x	✓	x	✓
Microsoft Kerberos	x	x	x	x	x	x

## Unsupported Operating Systems, Java, and Web Browsers

The InSite software is not compatible with the following configurations:

- Microsoft Java or IBM Java software (You must upgrade to the Sun Java software.)
- Sun Java 1.4.2
- Windows 2000 Professional
- Windows 2000 Server
- Windows ME, 98, or 95 operating systems

# Technical Bulletin

- Mac OS X 10.5.3 or earlier
- Mac OS X 10.4.10 or earlier
- Mac OS X 10.3.x
- Mac OS 9
- Netscape Navigator software
- Internet Explorer browser on a Mac computer
- Virtualization technology on a Mac computer (for example, Parallels Desktop or VMware Fusion)
- Safari software on a Windows operating system
